

EUROPEAN CENTRAL BANK
BANKING SUPERVISION

Press release

11 July 2022

ECB publishes supervisory banking statistics for the first quarter of 2022

- Aggregate Common Equity Tier 1 ratio decreased slightly to 14.98% in first quarter of 2022 (compared with 15.57% in previous quarter)
- Aggregated annualised return on equity down to 5.98% in first quarter of 2022 (compared with 6.71% for full year in 2021)
- Aggregate non-performing loans ratio fell further to 1.95% (down from 2.06% in previous quarter), while loans that show a significant increase in credit risk (stage 2 loans) continued to grow, standing at 9.28% (up from 9.14% in previous quarter)

Capital adequacy

The aggregate [capital ratios](#) of significant institutions (i.e. those banks that are supervised directly by the ECB) decreased slightly in the first quarter of 2022. The aggregate Common Equity Tier 1 (CET1) ratio stood at 14.98%, the aggregate Tier 1 ratio stood at 16.22% and the aggregate total capital ratio stood at 18.86%. Aggregate CET1 ratios at country level ranged from 12.39% in Greece to 26.44% in Estonia. Across Single Supervisory Mechanism business model categories, diversified lenders reported the lowest aggregate CET1 ratio (13.73%) and development/promotional lenders reported the highest (33.57%).

Asset quality

The aggregate [non-performing loans \(NPL\) ratio](#) decreased further to 1.95% in the first quarter of 2022, the lowest level recorded since supervisory banking statistics were first published in the second quarter of 2015. The decrease was driven by a further decline in the stock of NPLs to €369 billion

(compared with €374 billion in the previous quarter) as well as an increase in total loans and advances to €18,963 billion (compared with €18,138 billion in the previous quarter). At country level, the average NPL ratio ranged from 0.72% in Lithuania to 6.75% in Greece. Across business model categories, custodians and asset managers reported the lowest aggregate NPL ratio (0.33%) and diversified lenders reported the highest (3.14%).

Aggregate [stage 2 loans as a share of total loans](#) continued to increase in the first quarter of 2022, reaching 9.28% (up from 9.14% in the previous quarter). The stock of stage 2 loans amounted to €1,311 billion (compared with €1,261 billion in the previous quarter).

[Cost of risk](#) stood at an aggregate level of 0.56% in the first quarter of 2022 (up from 0.50% in the previous quarter). Across significant institutions, the interquartile range widened to 0.65 percentage points (up from 0.58 percentage points in the previous quarter).

Loans and advances subject to COVID-19-related measures

In the first quarter of 2022 total loans and advances subject to COVID-19-related measures decreased further to €421 billion, down from €444 billion in the previous quarter. The decrease was driven by other loans and advances subject to COVID-19-related forbearance measures, which declined to €55 billion from €67 billion in the previous quarter.

Factors affecting changes

Supervisory banking statistics are calculated by aggregating the data that are reported by banks which report COREP (capital adequacy information) and FINREP (financial information) at the relevant point in time. Consequently, changes from one quarter to the next can be influenced by the following factors:

- changes in the sample of reporting institutions;
- mergers and acquisitions;
- reclassifications (e.g. portfolio shifts as a result of certain assets being reclassified from one accounting portfolio to another).

For media queries, please contact [Philippe Rispal](#), tel.: +49 69 1344 5482.

Notes

- The complete set of [Supervisory banking statistics](#) with additional quantitative risk indicators is available on the ECB's banking supervision website.
